

Contents

1. Integrating the social sciences into ecohydrology: facilitating an interdisciplinary approach to solve issues surrounding water, environment and people
Lisa Hiwasaki, Salvatore Arico..... 3-9
2. Anthropogenic flooded lands and atmospheric methane
Ivan B. T. Lima, Fernando M. Ramos, João C. Carvalho, Luis A. Bambace, Jean P. H. B. Ometto, Reinaldo R. Rosa, Edmar A. Mazzi, Maria F. F. L. Raseria, Evlyn M. L. M. Novo..... 11-21
3. The use of remote sensing and modelling to detect small-dam influences on land-use changes along downstream riparian zones
Jacquelyn R. Duke, Joseph D. White, Shane J. Prochnow, Lisa Zygo, Peter M. Allen, Ranjan S. Muttiah
..... 23-35
4. Impact of the Al-Qara mountain fogwater forest on groundwater recharge in the Salalah coastal aquifer, Sultanate of Oman
Mahaad I. Shammis..... 37-49
5. Mass occurrence and toxicity of the cyanobacterium *Lyngbya majuscula* under phosphorus-limited conditions in the Red Sea.
Abdulrahman M. Al-Shehri, Zakaria A. Mohamed 51-57
6. The response of zoobenthos to “natural channelization” of a small river
Małgorzata Gorzel, Ryszard Kornijów 59-70
7. Zoobenthos of salmon rivers in the Kola Peninsula and Karelia (north-east Fennoscandia)
Vladimir Khrennikov, Igor Baryshev, Yury Shustov, Vladimir Pavlov, Nikolay Ilmast 71-77
8. Seasonal patterns of testate amoebae and ciliates in three peatbogs: relationship to bacteria and flagellates (Poleski National Park, Eastern Poland)
Tomasz Mieczan..... 79-88
- In memoriam: Prof. William C. Acker
Małgorzata Godlewska 89
